

## Brian Spain – District 2 Nominee

After graduating Cal Poly with an agricultural engineering degree, I started my professional career working as a product manager at Netafim USA. There I developed the personal and professional skills that have helped me at my current role with Landmark Irrigation. My love of ag, however, came from a young age, as I come from a family of farmers. My grandfather farmed cotton and various other row crops in the central valley, and my dad followed in his footsteps into the farming world. He switched to permanent tree crops starting with his first Pistachio orchard in the early 1990s. I grew up working with my dad on the farm and at the irrigation company, and those skills have served me well as I have begun to develop my own orchards.
